CIVL Competition Class paragliders Certificate of Compliance

I Manufacturer

Company name Flow Paragliders PTY LTD

Address 26 Kalmia Court, Elanora, QLD, 4221, Australia

II Test Laboratory (as appropriate)

Company name "as above"

Address _____

III Test Specimen

Brand name, model name and size Flow, SPECTRA2 L

Min take-off weight (kg) 110 Max take-off weight (kg) 125

IV Measurements Program: Results, Checks and Required Drawings

Canopy dimension	<input checked="" type="checkbox"/>	See Measurements file	Symmetric folding lines check	<input type="checkbox"/> Negative	<input checked="" type="checkbox"/> Positive
Line attachment points	<input checked="" type="checkbox"/>	See Measurements file	Asymmetric folding line check	<input type="checkbox"/> Negative	<input checked="" type="checkbox"/> Positive
Lines lengths	<input checked="" type="checkbox"/>	See Measurements file	Folding line attachment points check	<input type="checkbox"/> Negative	<input checked="" type="checkbox"/> Positive
Riser lengths	<input checked="" type="checkbox"/>	See Measurements file			

V Flight Test Program

Model Serial number SP2MRE2201029

Month/Year of production 12/2021

Flight test reference number (by Test Lab - as appropriate) n/a

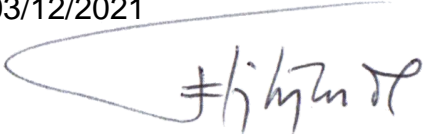

Canopy markings for Negative Positive collapses

Test Laboratory Manufacturer (reference certificate, date, place, signature)

Test pilot(s) name (s):
1. Felipe Rezende
2. Shane Tighe
3. _____

Flight test program Negative Positive completed

Manufacturer (date, place, signature)

03/12/2021

03/12/2021, Beechmont

Maison du Sport International,
Av. de Rhodanie 54, CH-1007 Lausanne

VI Structural Strength Test Results

Load Test reference number PS_112.2021

Load Model Serial number F0003

Month/Year of production 08/2021

Shock Load Test

Weak link [daN]: 1000 > max. take-off weight

Date (dd/mm/yyyy): 06/10/2021

Damage: Yes No

Sustained Load Test (max. load over 3 seconds)

Maxl load [daN]: 150 > max. take-off weight

Date (dd/mm/yyyy): 06/10/2021

Damage: Yes No

Calculated Max Weight

W_{max} [daN]: 133 > max. take-off weight

All line samples F_{break} >20 daN: Yes No

Main Brake Line Strength

(The main Brake Line Strength should be tested with the connecting knot to the handle)

F_{break} > 100 daN: Yes No

VII Additional Materials

Plans with dimensions and tolerances:

Refer to user's manual and Annexe B

Technical characteristics and list of materials

Refer to user's manual and Annexe B

User's manual:

Revision: 1.0

Date (dd/mm/yyyy): 03.12.2021

Website documentation page:

flowparagliders.com.au/spectra2

VIII Certificate of Compliance

The undersigned certifies that the model tested complies with the CCC requirements as defined in Section 7G – 2020 Edition – Revision 1.0

Test Laboratory Manufacturer
